## EAGLE CREEK GREENWAY EXTENSION PROJECT

The Indianapolis Department of Public Works is investing \$14.9 million in a greenway construction project to extend the Eagle Creek Greenway from West 46th Street to south of Downtown. The Eagle Creek Greenway will be the main artery of the Westside connectivity network that links neighborhoods, schools, parks and commercial areas.

### WHY INVEST?

Once complete, the Eagle Creek Greenway will be more than 16 miles long and have major access points at Eagle Creek, Thatcher, Ridenour and Ross-Claypool Parks.

Much like the Monon on the Northside, the Eagle Creek Greenway will have a positive transformative effect on the westside by energizing economic development, providing more options for recreation and improving connectivity.

### PROJECT SCOPE

The Eagle Creek Greenway will connect Eagle Creek Park and the City's Westside neighborhoods with Downtown and the Indianapolis Cultural Trail. The Greenway will also enhance the City's overall connectivity by providing a much needed Westside link to the City's existing greenway system.

Currently, two sections of the Eagle Creek Greenway have been completed. Two miles of trail are on the ground at the south end along Raymond Street and 1.8 miles of trail have been completed on the north end near the Pike Youth Soccer Complex.

The Eagle Creek Greenway will be 10 feet wide and comprised of asphalt and concrete. The Greenway will be open to bicycle and pedestrian uses. No motorized vehicles will be permitted to use the trail.

**The Greenway will be constructed in four concurrent segments:**

- North section from Eagle Creek to Dandy Trail
- Speedway section from Dandy Trail to 10th Street
- Middle section from 10th Street to the CSX Eagle Crk. Bridge
- South section from CSX Eagle Crk. Bridge to Kentucky Ave.

### PROJECT DETAILS

**PROJECT STATUS:** In Design

**ANTICIPATED CONSTRUCTION PERIOD:** Fall 2014-Summer 2015

**ESTIMATED PROJECT COST:** \$14.9 million

**PROJECT BENEFITS:**

- Increased trail facilities
- Improved connectivity between neighborhoods, parks, schools and commercial centers
- Added recreational features to four local parks

Project schedules and costs are subject to change.
